ATTENTION

THIS CHART CONTAINS HAZARDOUS  
ELEVATION FIGURES (FEET)

AERONAUTICAL INFORMATION

AERODROMES

Major aerodromes are shown with a hard surface runway  
length of 3000 feet or more. When the runway length  
is less than 3000 feet, the number following the name indicates the  
length of the longest runway in feet. Runway length is  
rounded to the nearest 100 feet.

VERTICAL OBSTRUCTIONS

Single  
Highest unlit obstruction  
Highest lit obstruction  
Height of tower above ground level (AGL)

FAF - Height of top of antenna above sea level (ASL)  
(MSL) - Height of top of antenna above mean sea level

Vertical obstruction symbols have been  
selected from information available as of  
July 1979.

All vertical obstructions 200 feet AGL and higher must be  
checked for their actual height above sea level. The height  
of obstructions is shown in feet. The height of obstructions  
is shown in feet. The height of obstructions is shown in feet.

Vertical obstruction symbols have been  
selected from information available as of  
July 1979.

CAUTION

The lowest reliable minimum obstacle clearance shown is based on  
the lowest reliable minimum obstacle clearance shown. There is a maximum  
height of 100 feet for the lowest reliable minimum obstacle clearance.
